

LPFM should not be allowed to take priority over current FM stations. I am an active listener of my local K-Love radio station, brought into my home through an FM translator service.

K-Love radio has changed my life. Because of their positive influence, I have become a more active member of my community in so many ways. Losing this station would be a huge loss in my personal life. Their great programming keeps me uplifted throughout my day - every day.

Even though it is a national station, we are also a family. Loss of any part of that community would be devastating. So many lives are affected each day by K-Love. Through their programming and personal connections, they have saved lives from suicide, drugs, and other personal losses. It also serves as a way of getting out the word about events in our local area.

I do not think that LPFM can have the same positive impact as stations like K-Love. With the national financial support from listeners, they are able to add stations in areas that might not otherwise be able to afford such a venture. It is in the public's best interest, for this reason especially, that we should not give LPFM priority over FM translators.

On behalf of all K-Love listeners...please, please don't take my, or any other, K-Love station away...

Thanks and God bless,
Melissa Leney
